EDUCATION

DePauw University

College of Liberal Arts and Sciences

Bachelor of Arts in Computer Science and Mathematics

- 2nd Place – Indiana Collegiate Mathematics Competition (ICMC); WiCyS 2025 Conference Scholarship Recipient; Dean's List Honors
- Relevant Coursework: Object-Oriented Programming, Data Structures & Algorithms, Database and File Systems, Computer Systems, Mobile Development, Statistical Computing, Linear Algebra, Differential Equations, Numerical Analysis

Greencastle, IN

GPA: 3.82 (Summa Cum Laude)

May 2026

EXPERIENCE

Pay Your Tuition Foundation

Technical Chief of Staff Fellow

- Coordinated end-to-end workflows across Salesforce, Webflow, and Make for the student crowdfunding platform, automating 12+ approval and validation steps and improving processing efficiency by 25%
- Integrated Salesforce CRM with internal databases via APIs, maintaining data consistency across 3 automation tools
- Managed technical communications with partner (Microsoft and IBM) to troubleshoot API connections and standardize integration workflows, improving system reliability and reducing sync errors by 30%

Washington, D.C.

Aug 2025–Dec 2025

VietinBank

Software Engineer Intern

- Implemented transaction-validation and account-lookup modules in Java Spring Boot with Oracle SQL, boosting data-retrieval efficiency by 35%, minimizing dashboard errors for internal teams, and gaining hands-on exposure to financial data flows
- Automated daily financial checks with Python and SQL, reducing manual review workload by ~80% while processing 50+ records per day with higher accuracy — designing reusable scripts for data preparation, validation, and transformation across structured Oracle SQL databases
- Developed secure authentication and reporting APIs supporting internal dashboards and enabling structured data retrieval across enterprise financial systems, cutting recurring report generation time by 40% for operations teams

Da Nang, Vietnam

May 2025–Aug 2025

DePauw University

Technical Lab Assistant

- Provided 1:1 debugging support for syntax, logic, and runtime errors, contributing to a 90% on-time assignment completion rate
- Implemented real-time updates for homework and exams, boosting user engagement by 30% for 200+ users
- Participated in over 15 code reviews and resolved over 10 critical bugs, contributing to improved project stability

Greencastle, IN

Feb 2025–May 2025

Khoi Nguyen Academy

Software Engineer Intern

- Collaborated with other software engineers to develop a responsive educational platform using HTML, CSS, and JavaScript; improved accessibility by 20% and enhanced user experience for students and instructors
- Implemented real-time updates for homework and exams, boosting user engagement by 30% for 200+ users
- Participated in over 15 code reviews and resolved over 10 critical bugs, contributing to improved project stability

Da Nang, Vietnam

May 2024–Aug 2024

Vietnamese Student Association - DePauw University

Internal Vice President

- Held a leadership position through a student organization, coordinating 8+ multicultural events for 500+ attendees and building strong relationships with teammates and external partners in a collaborative, inclusive environment
- Managed financial operations including budgeting and expense tracking, led fundraising initiatives, and drove 30% membership expansion — gaining exposure to procurement and vendor coordination concepts through hands-on operational management
- Developed presentations summarizing organizational performance for leadership, demonstrating advanced proficiency in Excel including data cleanup, analysis, and visualization

Greencastle, IN

June 2023–May 2024

PROJECTS

KITES | React Native, TypeScript, Firebase Cloud Messaging, Socket.IO, Google Maps SDK, React Navigation, Recoil, Axios

- Developed a native Android mobile child safety app in React Native and TypeScript with dual-mode authentication, persistent sessions via AsyncStorage, role-based navigation, and an embedded Gemini API-powered AI chatbot assistant with dynamic prompt engineering and multi-turn conversation handling
- Implemented real-time communication via Socket.IO and STOMP WebSocket for parent-child messaging, live GPS tracking via Google Maps SDK, and an SOS emergency button delivering instant push notifications to parents through Firebase Cloud Messaging (FCM)
- Built a monitoring dashboard with battery level tracking, low-battery warnings, image sharing, and global state management using Recoil across parent and child modes

Space Station Rescue Simulator | Java, Swing, AWT

- Built a 2D orbital simulation game featuring 5+ space stations and 20+ moving objects using Java Swing/AWT for rendering and controls
- Implemented collision detection with spatial hashing to handle debris interactions efficiently, improving simulation speed by ~30%
- Designed modular mission logic using Command and State patterns, simplifying new level integration and improving code maintainability

AI Chatbot - LLM API Integration | HTML, CSS, Javascript, Gemini API

- Built a browser-based AI chatbot using vanilla JavaScript and the Gemini API, enabling real-time user-AI conversations with dynamic prompt handling and context-aware session management
- Implemented asynchronous API calls and response rendering to support multi-turn chat sessions, error handling, and loading-state feedback
- Designed a responsive chat interface with HTML and CSS focused on message flow, usability, and clean UI interactions; integrated dynamic prompt engineering and session state management to maintain conversation coherence across turns

SKILLS

Programming Languages: Java, Python, C++, JavaScript, TypeScript, SQL, R, HTML/CSS

Frameworks & Libraries: React, React Native, Node.js, Express.js, Spring Boot, Axios, Java Swing, AWT, Firebase Cloud Messaging

Databases: MongoDB, PostgreSQL, Oracle SQL

Tools & Platforms: Git, GitHub, Drizzle ORM, WebSocket, Salesforce, AWS, Webflow, Razorpay, Visual Studio Code, IntelliJ IDEA, Linux/Unix, MS Office, Android Studio, Claude Code, Cursor, TensorFlow, Excel, Tableau, Google Cloud Platform, R Studio
